

# Noize Machine - User Guide

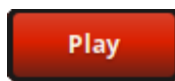

Noize Machine is an independent web page application. This is a simple user guide document to explain the workflow and functionality of the application.

## Starting the Noize Machine

1. Navigate to the web page: <http://radio1190.colorado.edu/noize-machine/>

2. Hit the “Play” button on the right side of the screen when you want to load the playlist and start streaming music.

3. The music will stream from the web page for as long as the tab is open. The song that is currently playing will be highlighted in blue on the left side of the page. You can leave it for however long you need to!

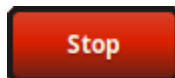

## Stopping the Noize Machine

If you are a DJ who takes to take control of the airwaves again, follow these steps:

1. Open DJ Pro in a new tab (if it is not already open) by clicking [Open DJ Pro] on the upper right hand side of the page underneath the time left in the hour. Log in and set up your playlist.

[Open DJ Pro]

2. Hit the “Stop” button on the Noize Machine. The currently playing song will finish, but the next song will not play. You can use the time remaining in song box to check exactly when the song will finish so you can time when you have to take over.

3. Upon hitting the stop button, the button will be greyed out and a blue pop-up will appear to confirm that the Noize Machine has been turned off.

Play

**RADIO 1190** DENVER / BOULDER **NOIZE machine**

4. Keep the Noize Machine tab open until the current song is finished playing, or else it will be

cut short. The Noize Machine can be left open even while it's not playing music. To start the Noize Machine again, just hit the "Play" button once it is no longer greyed out.
